Russia's USO Secrets

Unidentified Submersible Objects
in Russian and International Waters

Synopsis

It has often been said that we know more about the surface of the Moon than we do about the world's seas and oceans. The study of USOs (Unidentified Submersible Objects) is a case in point. For years, strange phenomena have been reported by people at sea, especially by navies around the globe. Although many of the USO files of the Soviet and Russian Navy remain secret, some have become available due to the painstaking efforts of dedicated researchers. Paul Stonehill and Philip Mantle reveal strange encounters by the Soviet and Russian Navy with things that are not supposed to exist. Here you will read about the mysterious kvakeri, the "swimmers" of Lake Baikal, the oddities of Issyk Kul, inexplicable events within the forbidding Arctic Ocean, and much more. Most of these stories have never been told outside of Russia or the former Soviet Union. They provide yet more evidence that we are not alone. Indeed, they suggest a permanent presence of something unusual in the depths of Earth's large bodies of water.

Customer Reviews

Reading this book was like a whistle stop tour of every UFO sighting in Russia and beyond, an

exhausting experience as it seems that Russia is swarming with unidentified objects of every shape, size and disposition. I was fascinated and amazed at the sheer volume of reports and the refreshingly matter of fact attitude of Russian authorities. It wasn't at all what I expected. On the downside, the book contains so many reports that by the halfway mark I had reached saturation point and found myself flicking pages. I felt that instead of addressing hundreds of sightings at a superficial level ie just a couple of paragraphs for each, there was plenty of scope for examining different categories or geographic areas in more depth. This would provide a better paced, less intense reading experience. For example, in one area UFOs were said to only visit in the spring and in another area the UFOs were reportedly aggressive towards people. I wanted to know more but frustratingly there was no further expansion of the subject. In summary: this is a fascinating read but I feel the author has an opportunity to do more with this astonishing collection of material.

This is what my testimony is about when I went to Washington DC to testify under oath before congress as a top secret military witness. So I know first hand this is real. Read more about that at thewebmatrix.net

Long overdue = WAAY overdue .. and finally here - and satisfyingly so. Must have!!
