The Secret Space Program And Breakaway Civilization (Richard Dolan Lecture Series) (Volume 1)

Synopsis

Is there a secret space program that is connected in some way to UFOs? In this booklet, historian Richard Dolan delves into this question, one of the most discussed in ufology today. Providing a wealth of data and context for the reader, he offers his own conclusion: yes, there is indeed such a program. But this program is not a simple extension of the normal operations of the U.S. government or military, much less of NASA. Instead, it seems to be the product of what Dolan has previously termed a "breakaway civilization," a radically advanced and increasingly separate structure that has access to classified science and data denied to the rest of us. Adapted from his classic lecture at the Secret Space Program and Breakaway Civilization conference in San Mateo, this is now offered as a volume in the Richard Dolan Lecture Series.

For those that don't know, Richard Dolan is a scholar, historian, and renown researcher within the field of alternative research. Dolan's research has been integral in bringing in a new fresh point of view within the field of UFOlogy and this works exemplifies this rather trenchantly. The Secret Space Program & Breakaway Civilization by Richard Dolan mirrors incisively the rest of his works quite well, although in a much more shortened manner given the length of the book. Having coined the term "Breakaway Civilization" in his UFOs & The National Security State series, Dolan follows up with this booklet which is a salient synopsis of the presentation he gave in San Mateo, CA in 2014 at the Secret Space Program & Breakaway Civilization Conference. Admittedly, if you have seen that

particular presentation of Dolan on youtube, then this will be nothing new. However, if you are new to the subject, or want to have a written reference for what Dolan discussed in his presentation, then this book is certainly for you. Dolan begins discussing UFO reports/statistics and the ongoing phenomena. Thereafter, the author discusses the fascinating story of Ingo Swann and his remote viewing prowess. Swann's findings and experience definitely lend a thread of credibility that makes the reader aghast at the possibilities. The fact that remote viewing experimentations were taking place decades ago shows how vital this type of discipline was to reconnaissance and more. Discussed soon after are Karl Wolfe's testimony, which he shared during the Disclosure Project, Donna Hare's testimony regarding having to airbrush any evidence of UFOs as well as the story of Vito Saccheri.
