Chemical Sensitivity, Vol. 2: Sources Of Total Body Load

Synopsis

Chemical Sensitivity is the first major scientific book series on chemical sensitivity, an increasingly important worldwide health problem. This four-volume series features results from the study of more than 20,000 environmentally sensitive patients at the Environmental Health Center (EHC) in Dallas. Results from the study at EHC are supplemented by information accumulated from the treatment and study of an estimated 100,000 patients by other environmentally oriented physicians and scientists around the world.

Book Information

Series: Chemical Sensitivity (Book 2)

Hardcover: 569 pages

Publisher: CRC Press / Lewis Publishers (February 11, 1994)

Language: English

ISBN-10: 0873719638

ISBN-13: 978-0873719636

Product Dimensions: 1.5 x 6.5 x 9.8 inches

Shipping Weight: 2.4 pounds

Customer Reviews

I recommend people with MCS and EMF sensitivity stay away from these series of books. I got through my MCS and EMF sensitivity by treating it as PTSD and conditioned responses and no longer have either of these. Various stuff around brain retraining that is all over the internet was very helpful. This series contains lots of stuff that will encourage avoidance and fear which only makes the problem worse. This doctor and book are well intended, but do not contain the best information for someone seeking to get through this. Environmental doctors while very knowledgeable about the illness are missing some key points which prompts more fear which makes the illness worse.

This book is part of a four-volume set written by THE authority on environmental illness. He is currently in the process of publishing the second edition of this set, with the first two volumes available at the time of my writing. But, the old volumes include so much information that isn't in the

new volumes that I thought it was worth buying both sets. I was not disappointed.
