Cataloging For School Librarians

Synopsis

Cataloging for School Librarians presents theories and practices of cataloging and classifying print, non-print, and other materials. The text covers Aacr2, Rda, Frbr, Sears, and Dewey Decimal, along with examples of other cataloging techniques. This book guides new and seasoned catalogers in order to meet current national library standards.

Customer Reviews

I had to purchase this for one of my college classes. It's nice and new and great for it's price! I would highly recommend! It was cheaper on this site than any where else. However it did take longer to ship so I had to go a few weeks into class without my textbook.

It has a lot of good info, but it also often points out things that a school librarian doesn't need to know. I would rather it skip these topics or just share the information - don't just say I won't need to know this.

Yes, I had to buy this for a not so fun class. However, my complaint is that there are many MISTAKES! Like page 111, Table 8.2 should have \$a before Myers, Walter Dean and before The blues of Flats Brown, for example. The book is about cataloging, which is all about DETAILS! So get the DETAILS right!
