Supercritical Fluid Extraction Of Nutraceuticals And Bioactive Compounds

Synopsis

Enhanced concern for the quality and safety of food products, increased preference for natural products, and stricter regulations on the residual level of solvents, all contribute to the growing use of supercritical fluid technology as a primary alternative for the extraction, fractionation, and isolation of active ingredients. As a solvent-free process, supercritical fluid technology is a popular answer for the functional foods and nutraceutical sector, one of the fastest growing consumer driven markets. Recent advancements in the technology and increased utilization of the process demand a comprehensive, single-source review of current and future trends in supercritical fluid technology. Compiling contributions from international experts in the field, *Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds* presents the state-of-the-science in the extraction and fractionation of bioactive ingredients by supercritical fluids. Focusing on implemented industrial processes and trends, it reviews the fundamentals of the technology and examines the economics of supercritical fluid extraction systems and processes. Over the course of twelve chapters, the book presents the supercritical fluid extraction processes in edible oils, including fish oils and specialty oils; herbs, such as Latin American plants and those used in Traditional Chinese Medicine; algae; spices; antioxidants and essential oils; as well as the processing of micro and nano-scale materials by supercritical fluid technology. Each chapter covers the major active components in the target material, including chemical, physical, nutritional, and pharmaceutical properties; an analysis of the specific supercritical fluid process used; a comparison of traditional processing methods versus supercritical fluid technology; and a set of conclusions with supporting data and insight.

Book Information

Hardcover: 424 pages

Publisher: CRC Press; 1 edition (November 28, 2007)

Language: English

ISBN-10: 0849370892

ISBN-13: 978-0849370892

Product Dimensions: 1 x 6.5 x 9.8 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars See all reviews (1 customer review)

Best Sellers Rank: #2,393,713 in Books (See Top 100 in Books) #983 in Books > Science & Math > Chemistry > Industrial & Technical #1821 in Books > Engineering & Transportation > Engineering > Bioengineering > Biotechnology #1933 in Books > Medical Books > Medicine >

Customer Reviews

Very informative, easy to go understand and highly useful. Can be used as handbook of SFE process unlike many other books available on this topic.

Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds
Rodd's Chemistry of Carbon Compounds, Part D: Membered Heterocyclic Compounds With More Than 2 Heteroatoms in the Ring (Rodd's Chemistry of Carbon Compounds 2nd Edition)
Natural Extracts Using Supercritical Carbon Dioxide
The Chemistry of Heterocyclic Compounds, Oxazoles: Synthesis, Reactions, and Spectroscopy, Part B (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 60)
Rodd's Chemistry of Carbon Compounds. Second Edition. Volume IV. Part L: Heterocyclic Compounds (v. 4L)
Rodd's Chemistry of Carbon Compounds, Volume 2: Alicyclic Compounds, Part D: Steroids. Second Edition (Vol 2D)
The Chemistry of Heterocyclic Compounds, Monoterpenoid Indole Alkaloids - Supplement (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 25)
The Chemistry of Heterocyclic Compounds, Isoquinolines (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 38)
The Chemistry of Heterocyclic Compounds, Condensed Imidazoles, 5-5 Ring Systems (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 46)
The Chemistry of Heterocyclic Compounds, Quinoxalines: Supplement II (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 61)
The Chemistry of Heterocyclic Compounds, Oxazoles (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 45)
The Chemistry of Heterocyclic Compounds, The Pyrimidines (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 52)
The Chemistry of Heterocyclic Compounds, The Pyrazines Supplement I (Chemistry of Heterocyclic Compounds: A Series Of Monographs, Vol. 58)
The Chemistry of Heterocyclic Compounds, Indoles: The Monoterpenoid Indole Alkaloids (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 25)
The Chemistry of Heterocyclic Compounds, Fused Pyrimidines: Pteridines (Chemistry of Heterocyclic Compounds: A Series Of Monographs) (Volume 24)
Methods for the Oxidation of Organic Compounds: Alcohols, Alcohol Derivatives, Alkyl Halides, Nitroalkanes, Alkyl Azides, Carbonyl Compounds, Hydrox (Best synthetic methods) (v. 2)
Espresso Extraction: Measurement and Mastery
Tecnicas quirurgicas en exodoncia y cirugia bucal / Extraction and surgical techniques in oral surgery (Spanish Edition)
Hair Transplant 360: Follicular Unit Extraction (FUE)
Structure-based Design of Drugs and Other Bioactive Molecules: Tools and Strategies
